Office Action Summary	Application No. 10/598,447	Applicant(s) OAG, JAMIE	
	Examiner JUSTIN JONAITIS	Art Unit 3752	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Drawings

1. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the outlet surface of the body of claims 5 and 6 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Objections

2. Claims 7-27 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim 3. See MPEP § 608.01(n). Accordingly, the claims 7-27 have not been further treated on the merits.

Art Unit: 3752

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-6 and 28 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent #3,029,030 to Dey, Sr..

Dey Sr. discloses a nozzle comprising a body (body (15)), a channel extending through the body (central cylindrical bore (16)) extending through the body of the nozzle; and a fluid deflector (rectangular baffle plate (1)) located in the fluid flow path and extending through the nozzle along the channel at a downstream end of the channel, wherein the fluid deflector determines the direction of flow of the fluid as it leaves the nozzle. Where the fluid deflector and the body of the nozzle define a width of the channel (part of the channel is defined between the deflecting surface and the outlet surface of the body) at the downstream end (deflector has stem (5) that is within the body (15) defining the width of the channel). The device including the deflecting surface and the body outlet surface being substantially parallel.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. U.S. Patent #3,387,791 to Allenbaugh discloses a nozzle with similar structure and components. U.S. PG-Pub 2002/0020764 to Bendig et al. discloses a nozzle with similar structure and components. U.S. Patent #6,183,941 to Hayes discloses a nozzle with similar structure and components. U.S. Patent #5,954,877 to Hayes discloses a nozzle with similar
